

## New Fire Service Started January 1, 2015

The Summer Village of Sandy Beach is pleased to announce our New Fire Service from Sturgeon County. Your Council felt it was their responsibility to try to reduce costs to the tax payers of the Summer Village without jeopardizing the service. They were able to sign a contract with Sturgeon County Fire Department for comparable service at a significantly reduced cost that commenced January 1, 2015.

We will follow Sturgeon Counties Fire Bans so please adhere to the signs posted in the Summer Village.

Nothing else has changed!! You still call 911 in an emergency. You need to make sure your address is clearly marked on your property so the Fire Department will have no confusion finding the correct address.

If you do call for the fire department, you the property owner will be charged for the cost. There is insurance coverage for this cost - please check with your insurance service provider to make sure you have this coverage.

Council certainly hopes you never have to use this service but if you do, they feel they have made sure everything is in place.
