Message: Dear Summer Village of Sandy Beach,

The Alberta Sailing Association wants to help you bring sailing to your community through our Mobile Optimist Sailing School (MOSS) program. What separates the MOSS program from a traditional sailing school or learn to sail program is the "M" of MOSS; this program is mobile. The mobile nature of the program allows ASA as a provincial association to bring nationally certified sailing instructors and all of our equipment to more communities in Alberta and the Northwest Territories. We want to help you be successful in having the ASA MOSS program bring sailing to your community this summer.

Get Youth Sailing Optimists on Albertan Lakes!

The Optis is one of the most popular fleets around the world and has become the international standard for youth sailing. Through MOSS you will lay the groundwork for your community to develop its own Learn To Sail and or Race Programs, creating good competition, a fun community, and opportunity to introduce youth to sailing.

What we will bring to you:

8 optis; including the hull, blades, sails, bailer, paddle and all appropriate safety rigging, Spare parts and basic repair kits, Dollies, 3 Three-person kayaks, Motor boat, Marks, Safety equipment, Basic first aid kit. In a fun and safe learning environment we will deliver CANSail programs that are best suited for the needs of the group and mentor local instructors or instructor candidates.

Tailoring the program to your community:

The MOSS program aims to meet the specific needs of each community through the delivery of 3 different programs for you to choose from. Find out more on our website <http://albertasailing.com/moss> Refer to the full program information package for an application form and a complete list of steps to be successful in having the ASA MOSS program come to your facility this summer! Please contact us with any questions.

Best Regards,

Monica Lillo
