

Deputy Mayors report

Nov 19 2020

I thank the Mayor for the coverage of meetings attended in his report.

I am disappointed in the response from Mike Yakemchuk (Myalta Ventures) to the questions asked. It would appear that there is no concrete information about the daily operation of the transmission line or related costs. It would appear that none of the figures presented in the O&M budget can be taken at face value and it would be up to the steering committee to set budgets for legal, insurance and operation without knowing the actual operation parameters , or consequences of a budgetary decision. I personally find this unacceptable at this time.
