

Deputy Mayors Report June 20 2021

Lagoon Discharge update

Saturday June 5 walked the site and discharge areas with Guy Trembley and Trevor Gardener. Trevor took us through the whole discharge procedure and we went to the collection areas. Trevor also provided us with the equipment needed for the discharge. It was evident that there is still too much accumulation of water in discharge area and we will probably not be able to start discharge until July. The pathways are overgrown with some fallen trees, and Guy will spent 6-8 hrs cleaning up for safe and regular access. He will be monitoring water levels to see when we can begin discharge.

We got in touch with Brett from CB Max and we were able to meet and walk through site with him on Tues June 8. He will be present us with a budget for Lagoon Manager position and the supervision of samples and documentation for the discharge. When we receive this we will call a lagoon committee meeting and hopefully have all paperwork ready before July.
