

Summer Village of Sandy Beach
Deputy Mayor Larysa Lucin's Report
May 19, 2022

1. I met with Rodney for Pisim and Councilor Harney to go through the paths on Lakeshore. We discussed what our next steps are and where we would like to begin with the first phase of this project. Some areas will be widened a bit to allow the sun to come through to keep paths dry. We will be starting with paths that are already established.

Report submitted by Larysa Lucin

Councillor Mike Harney Report

May 19 2022

Wild Water AGM April 30 2022

Project hopes to be finished with the build stage by the end of this year. Hook up with Entwhistle, the line to Nakamun Park and hook up to Ross Haven are the last to complete.

It should be noted that the Wild water line has made a strong improvement in the water quality available to many of the municipalities involved especially at some of the First Nations communities which had previously had to deal with off and on water boil restrictions.

Financially, the commission is in a strong financial position, and a representative of the audit firm reviewed the report at the meeting.

The administration is now transitioning from a project build phase to a full Utility operation with appropriate policies and governance. The whole project was designed and built towards future needs and expansion. Organizing as a Utility will allow sales to fund future growth to meet the needs of members over the long term.

The problem of ice build-up at the Sandy Beach truck fill was brought up with the suggestion to raise the 2 inch line overhead, for proper drainage into tanks before unhooking.
