

Mayor Report

September 19, 2019

Summer – did we even have one this year? The weather during June, July and August was not favourable for the Summer Village in terms of scheduled projects. Delays have again been encountered with the lagoon discharge, road, ditch and drainage projects, vegetation mitigation and the installation of new village road and address signs.

In spite of the weather, a big shout out to our Village Administration and especially Public Works for maintaining the Village in such good condition. I have received comments from local residents and visitors alike who have indicated that our Summer Village, when driving through, looks very well cared for, clean, tidy and attractive.

FCSS Committee

This committee has not met recently but a meeting is planned for late September or early October. It is suggested that a deadline to submit funding applications is September 30, 2019.

Firesmart Committee

This committee has not met recently and may not meet until the Village signs have finally been installed.

The vegetation mitigation project is now awaiting good weather and the hiring of a crew to complete the assigned area clearing.

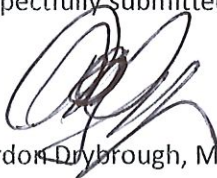

Emergency Management

Two individual represent the Summer Village at the Agency level for the Regional Emergency Management group. A change for the Director of Emergency Management to Elain Guy is being proposed and our CAO Mr. Liebenburg will remain as Deputy Director of Emergency Management.

Elected officials who sit on the Regional Emergency Management Committee are the current Mayor and Deputy Mayor.

On September 9 and 10, 2019, Deputy Mayor Harney and I both attended and completed the ICS-200, (Incident Command System, Level 200), course, and both passed the required exam.

Respectfully submitted

Gordon Drybrough, Mayor
